

## Builder – accident at work – case study example, MetLife UK

Extract from MetLife's 2025 Claims Booklet

# Broken bones & Hospitalisation

### Incident

Mr G, a builder, had an accident at work where he fell two stories from a ladder. He fractured L1, L2, L3, L5, T3, T4, T5, T6, T7, T8, T9, C6, C7, sternum, 9 ribs & his left & right parietal bones. He was also hospitalised due to a traumatic brain injury as a result of these fractures.

### What MetLife did

The policyholder held three units of cover, which meant MetLife were able to pay £36000 for the 16 major fractures Mr G sustained, £4050 for the 9 minor fractures and £14250 for the 95 days he spent in hospital.

### Payment

We helped him focus on his recovery with a payment of:

**£54,300**

Policy purchased on or after 8th February 2018.
